Structure Safety & Stability Certificate

As per information received from Principal of “**PRIME STEPS INTERNATIONAL SCHOOL SHAHZADPUR**” at Village: **Shahzadpur, Tehsil: Naraingarh, Distt.-Ambala (HR)** for SDS Educational Trust.

I visited the site and found that the building constructed in RCC ROOF & brick work in cement mortar is in good condition, no cracks in rcc structure in the view of Structural Safety for 2026-27. The building is safe & stable and confirms to latest version of IS-Code namely :IS:456:2000, SP-16, IS:4326, NBC of India etc. The building construction material used was good quality. The building has the drinking water facility, proper electric fitting & toilet facility proper.

As per my opinion the Building Structure is safe and stable for use as an educational building for children and staff.
